**Subject:** Emission Inventory Preparation Plan for the Uintah Basin  
Uinta Basin IPP document draft 1 8 15.docx

Jody and Cindy

Here is a real rough draft of an inventory preparation plan that I would like to have your help on. Monica and I have discuss the need for such a plan in order to clearly state the need Region 8 will have for an emission inventory in the Uintah Basin in the next few years in the case that a TIP/FIP is necessary for the area.

I am still writing sections of the plan and I am waiting input from Gail Tonnesen on the modeling aspect she envisions for the Basin. Would you give a look at the plan and provide input. I hope to have a workable draft completed by the middle of next week for internal review. Monica thought that we would share it with the State of January 22. This will be about a week before we all meet in Salt Lake City where it can become part of the discussion during the meeting.
